Executive Summary

Why a Community Health Needs Assessment?

- ▶ Texas Health Resources, a leading faith-based nonprofit health care system in North Texas, is committed to improving the health and well-being of the people who live and work in the communities we serve.
- ▶ Texas Health provides hospital care, but also offers programs intended to educate people about health and provide them with resources to prevent illness, maintain health and improve their overall well-being.
- ▶ Texas Health has completed this community health needs assessment in order to better understand the health status and needs of the community and use the knowledge gained to implement programs that will benefit the community by:
 - ▶ Identifying unmet needs in community health and developing strategies to address those unmet needs
 - ▶ Informing the community about health services and available resources
- ▶ For more information regarding Texas Health Resources please visit <http://www.texashealth.org>

- I** Texas Rehabilitation Hospital of Fort Worth (Texas Rehab Hospital)
- J** USMD Hospital at Arlington
- K** USMD Hospital at Fort Worth

Community Health Improvement: Statement and Goals

- ▶ **Statement:** Texas Health Huguley, a Texas Health Resources joint venture partner, is supportive of Texas Health’s efforts to improve the health and well-being of the people who live and work in the communities we serve.
- ▶ **Goals:** “Community Health supports the mission and core business of Texas Health by targeting preventive health/wellness activities and services to ensure the fulfillment of its charitable mission, to positively impact the health status of disproportionate unmet health needs populations, to facilitate the coordination of care (specifically prevention and disease management outreach activities) across the entire community, and provide community based activities that support and enhance hospital service lines and key performance indicators.”

Executive Summary

Community overview and population health indicators

Community Highlights

- ▶ Texas Health Huguley’s community is comprised of 354,700 people, and is projected to grow to 411,600 people by 2017; a growth rate of 16.1% exceeding that of Texas 7.3%.
- ▶ The community is young, having 28.3% of the population younger than age 18, compared with 27.0% in Texas and 23.5% in the U.S.
- ▶ Median household income is \$49,997, compared with \$49,000 in Texas and \$50,000 in the U.S.
- ▶ A figure of 33.0% of the population is reported below 200% Federal Poverty Level, less than the Texas figure of 44.9% or U.S. figure of 39.0%.
- ▶ The percent of persons living in the community that are uninsured is 22.8%, which is lower than the Texas average of 24.0%, but higher than the 16.0% in the U.S.
- ▶ Overall, the population has a higher number of avoidable inpatient admissions than Texas or the U.S.
- ▶ This population also uses the emergency room at a much higher rate than the overall Texas or U.S. populations.
- ▶ There is an overall shortage of primary care physicians, and the shortage is larger when considering physicians who accept Medicare and Medicaid.

Health Indicator Groups

- ▶ Birth Indicators-such as percent of low birth weight babies or teen birth rates
- ▶ Death indicators-such as all cause deaths or deaths from cancer
- ▶ General Health-such as self reported healthy days or no exercise
- ▶ Health Screenings-such as diabetes or cholesterol screening
- ▶ Clinical Prevention Services-such as an annual physical or vaccination
- ▶ Chronic Diseases and Conditions-such as diabetes or asthma
- ▶ County-level Physical Environment-such as crime rate or adult literacy
- ▶ County-level Substance Use and Reportable Conditions-such as drinking and chicken pox vaccinations

Executive Summary

Criteria for community highlights and health indicator groups

Executive Summary

Addressing the health needs of the community

Community Health Issues	Texas Health Huguley
Access: Provider Supply	X
Awareness, literacy, navigation	X
Cancer	X
Chronic Disease	X
Injury and Violence	X
Maternal, Infant, and Child Health	X
Mental Health	X
Nutrition, Physical Activity, and Obesity	
Oral Health	X
Other Clinical/Preventive	X
Preventive/Wellness	X
Reproductive and Sexual Health	
Social Determinants	X
Substance Abuse	
Tobacco	X
Transportation	X

Texas Health Huguley’s efforts to address the health needs of the community will focus on two areas: Awareness, Literacy and Navigation (ALN) and Chronic Disease. The following strategies will be implemented:

Awareness, Literacy and Navigation

- Development of an Area Resource Guide
- Maintain Existing Programs with Awareness, Literacy and/or Navigation focus
 - Educational Programs
 - Community Calendar
 - Mobile Health Unit
- Sponsorship of Area Collaboratives

Chronic Disease

- Maintain Existing Programs with Chronic Disease focus
 - Educational Programs
 - Diabetes Management Center
 - Mobile Health Unit
- Sponsorship of Area Collaboratives

Vast amounts of quantitative and qualitative data were collected, refined and analyzed during this Community Health Needs Assessment process. Detailed data is presented in this document. The chart above summarizes the most significant health issues facing the community.

Community Health Needs Assessment

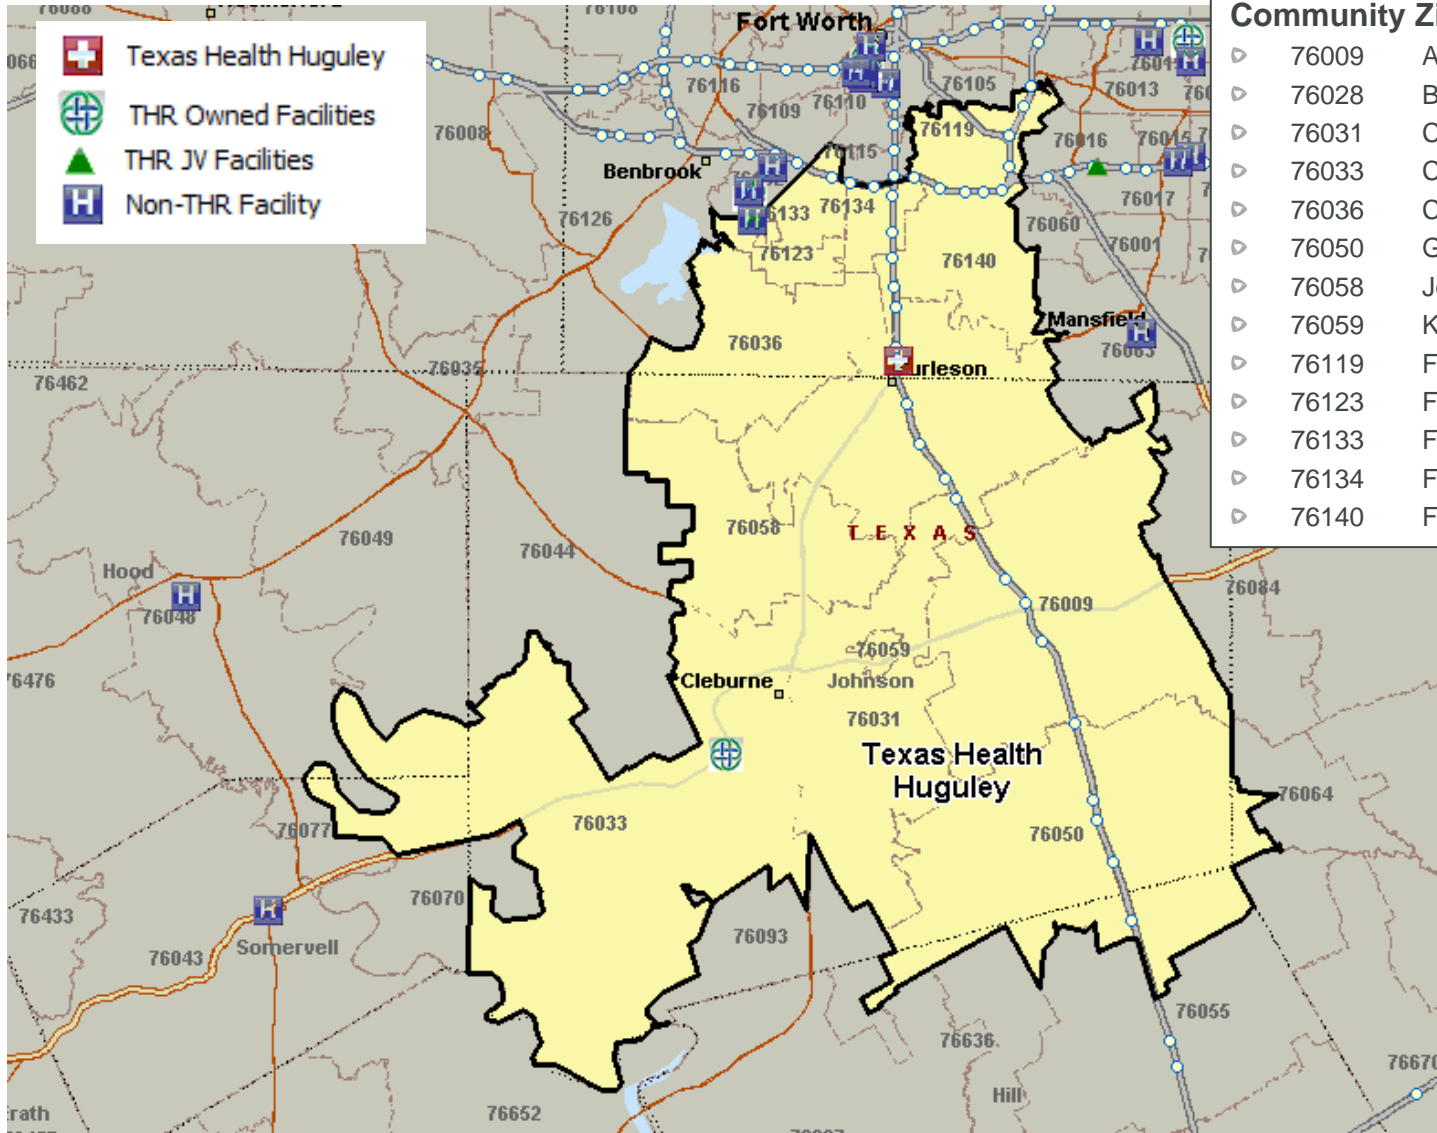

Secondary Data Assessment:

- **Definition of the Community**
- **Demographic Assessment of the Community**
- **Economic Indicators**

Texas Health Huguley

Definition of the community

Community Zip Codes:

▷ 76009	Alvarado	Johnson County

U.S. and Texas percentages from Kaiser Family Foundation State Health Facts and National Information Center for Higher Education Policymaking and Analysis. Gray shading = Community statistic is less favorable than State of Texas.

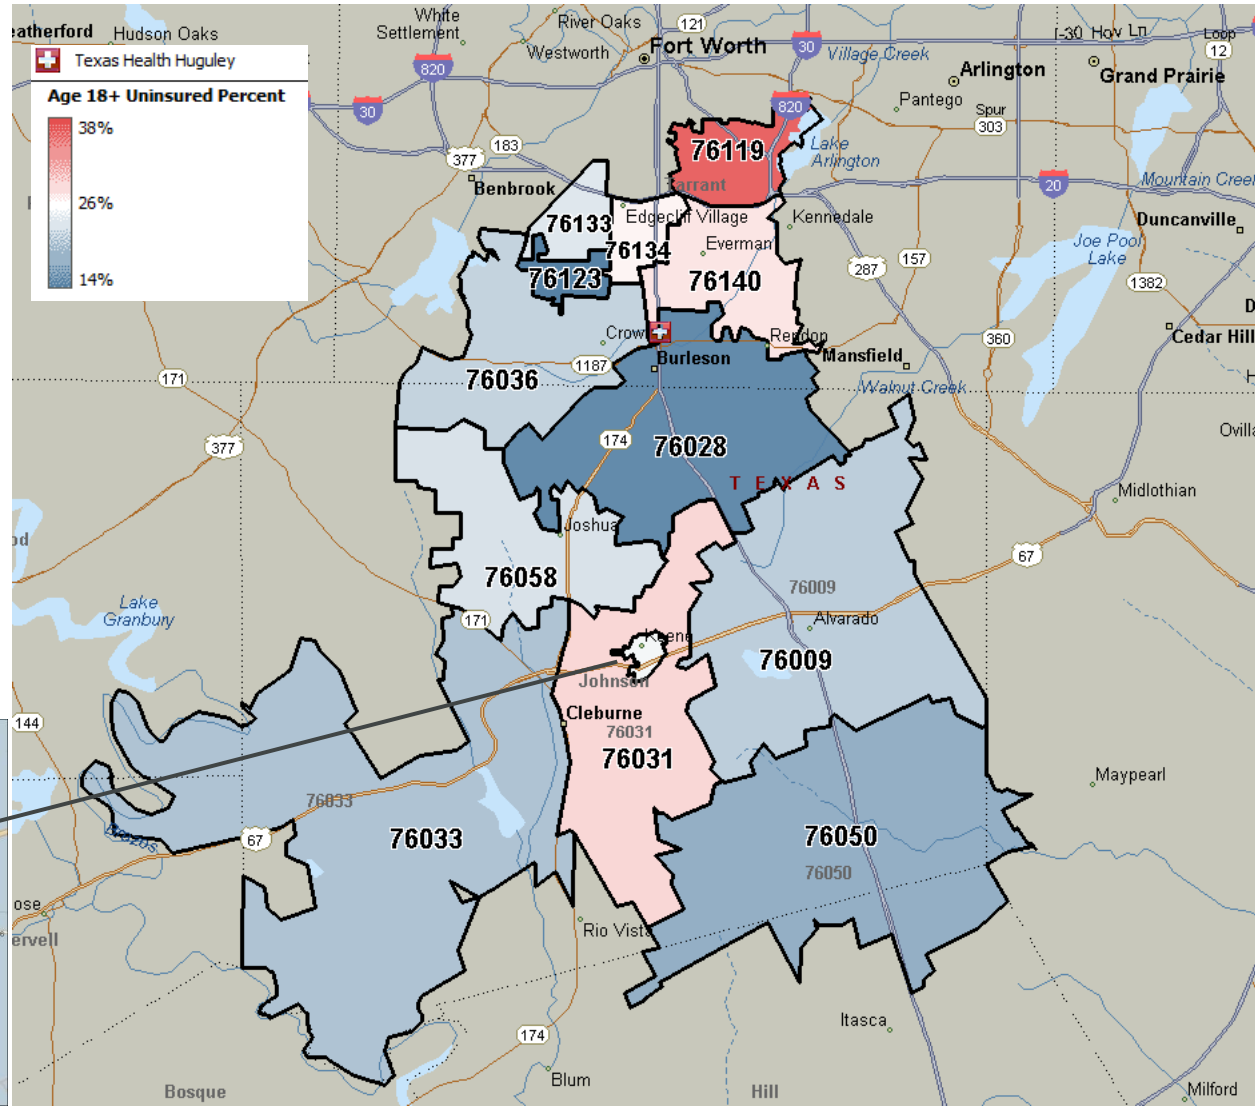

Texas Health Huguley

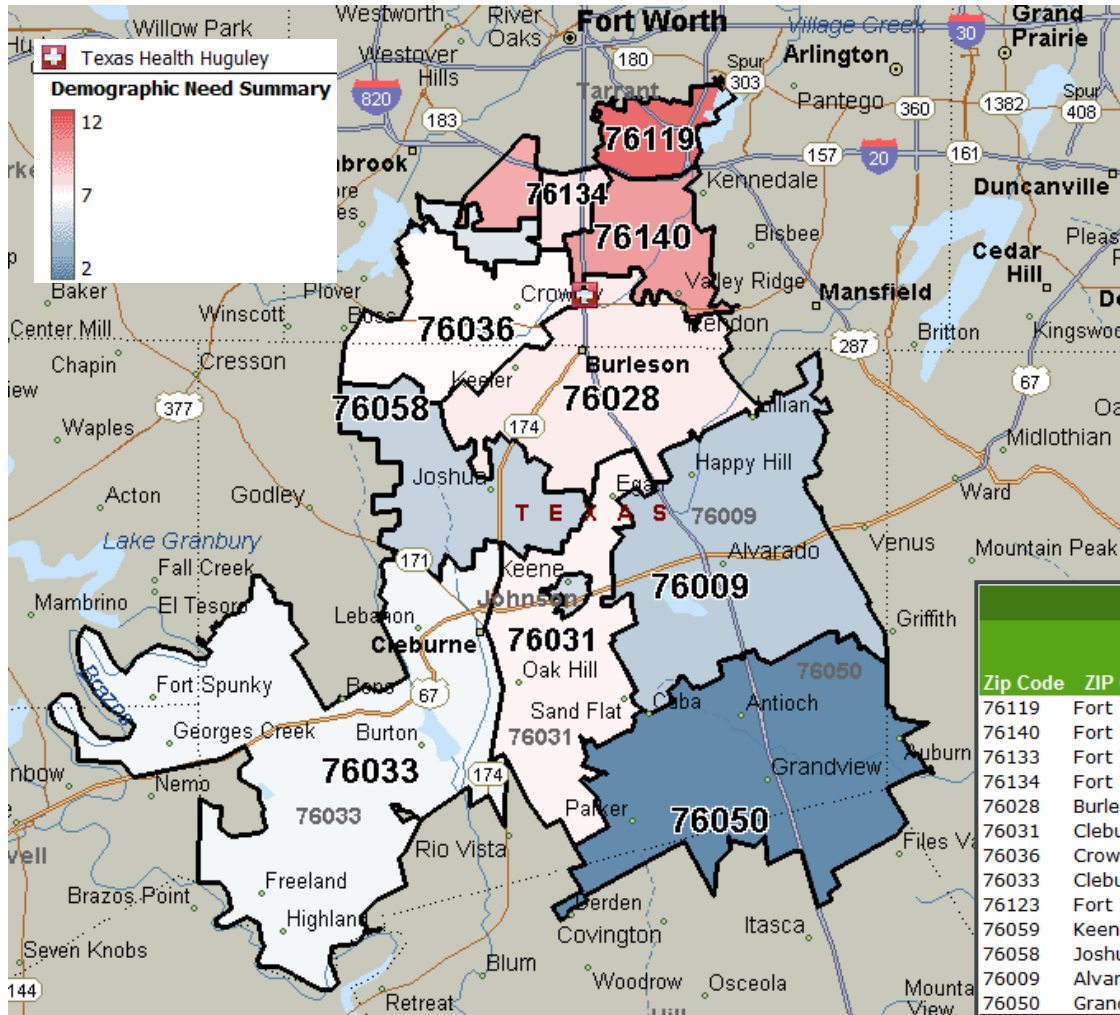

2012 percent of 18+ population that is uninsured

- Community = 23%
- Texas = 24%
- U.S. = 16%
- 76119 37%, has the largest percentage of uninsured.
- 76123, 14%, has the lowest percentage of uninsured.

Demographics Needs Summary

Population of focus

- ▶ Red shows areas of higher need.
- ▶ This map is based upon a grading system that includes population size and growth, lower income and the number of persons without health insurance.

Demographics Needs Summary

Texas Health Huguley Community Inpatient utilization summary

- ▶ The community uses the hospital at a slightly lower rate than the Texas average.
- ▶ This may be because the people within the community are slightly younger than the Texas average and because younger people use the hospital less¹.

Rank	Major Diagnostic Category (MDC)	<18	18-44	45-64	65+	Total

Treat/Release Total	170,812	100%	100%	0.0%

- ▶ The community visit rate per 1,000 people is much higher than the state average.
- ▶ Note that a reported emergency room visit rate higher than the state is a concern however, if the rate is lower it could be attributable to a few smaller facilities not reporting its emergency room visits.

Data Sources: Emergency department acuity data, for Jan-Dec 2011 and Jan-Sep 2012, from Dallas Fort Worth Hospital Council. U.S. distributions from National Hospital Ambulatory Medical Care Survey: 2009 ED Summary Tables. Zip code population estimates and projections retrieved by Texas Health Resources Strategy and Business Planning Department from Truven. Note: Emergency Department (ED) acuity is meant to show the mix of persons that visit the ED for serious illness, such as heart attack, as opposed to those that visit the emergency for reasons that could be treated outside the ED, such as an ear ache.

*Note: 2012 was annualized from Jan-Sep 2012 visits.

Provider Supply/Demand

Dentists, primary care doctors and psychiatrists

- ▶ The community shows a shortage in dentistry, primary care and psychiatry.
- ▶ When considering the limited number of providers accepting Medicaid and/or Medicare the doctor shortage increases.

Zip	Population	Dentist	Family Practice	Internal Medicine	Pediatrics	Total Primary Care Doctors	Psychiatrist
76009	20,329	2	1	0	0	1	0
76028	63,165	18	9	9	4	22	3
76031	17,135	0	1	1	0	2	2
76033	26,118	20	14	6	2	22	0
76036	24,110	11	3	1	2	6	0
76050	6,249	2	0	0	0	0	0
76058	17,277	2	5	0	0	5	0
76059	4,672	1	5	0	0	5	0
76119	42,973	2	10	3	0	13	1
76123	31,459	5	1	1	0	2	0
76133	49,736	16	13	2	5	20	1
76134	23,742	2	1	0	0	1	0
76140	27,708	3	1	0	0	1	0
Total	354,673	84	64	23	13	100	7

Provider need per 100,000 population	60.0	22.5	19.0	13.9	55.4	5.7
Providers required for community	212.8	79.8	67.4	49.3	196.5	20.2

Surplus (Shortage)	(128.8)	(15.8)	(44.4)	(36.3)	(96.5)	(13.2)
---------------------------	----------------	---------------	---------------	---------------	---------------	---------------

The shortage could be greater considering:

31% of Texas doctors are not accepting new Medicaid patients ¹	Not applicable	(35.1)	(51.3)	(40.2)	(126.6)	(15.3)
69% of Texas doctors do not accept Medicaid at all ²	Not applicable	(35.1)	(51.3)	(40.2)	(126.6)	(15.3)
17% of US physicians are not accepting new Medicare patients ¹	Not applicable	(26.7)	(48.3)	(38.5)	(113.5)	(14.4)

Data Sources: Physician counts from American Medical Association, Texas State Board of Medical Examiners and Texas State Board of Dental Examiners. Physician need population ratios from Solucient and DGA, and dentist population ratios from Kaiser Family Foundation State Health Facts. Population estimates and projections were retrieved by Texas Health Resources Strategy and Business Planning Department from Truven.

Health Professional Shortage Areas

Primary medical care

- Health Professional Shortage Areas (HPSAs) are designated by the U.S. Department of Health and Human Services as having shortages of primary medical care providers and may be geographic (a county or service area), demographic (low income population) or institutional (federally qualified health center or other public facility).
- Shortages are defined by population-to-physician ratios, or by other indicators including - but not limited to - poverty rate, infant mortality rate, and physical distance from care.
- Geographic or demographic shortage areas are shown on map in red. Reported institutional HPSAs are listed.

HPSA Name	HPSA Type	County
North Texas Area Community Health Center, Inc.	Comprehensive Health Center	Tarrant
Federal Medical Center - Carswell	Correctional Facility	Tarrant
Federal Correctional Institution - Fort Worth	Correctional Facility	Tarrant

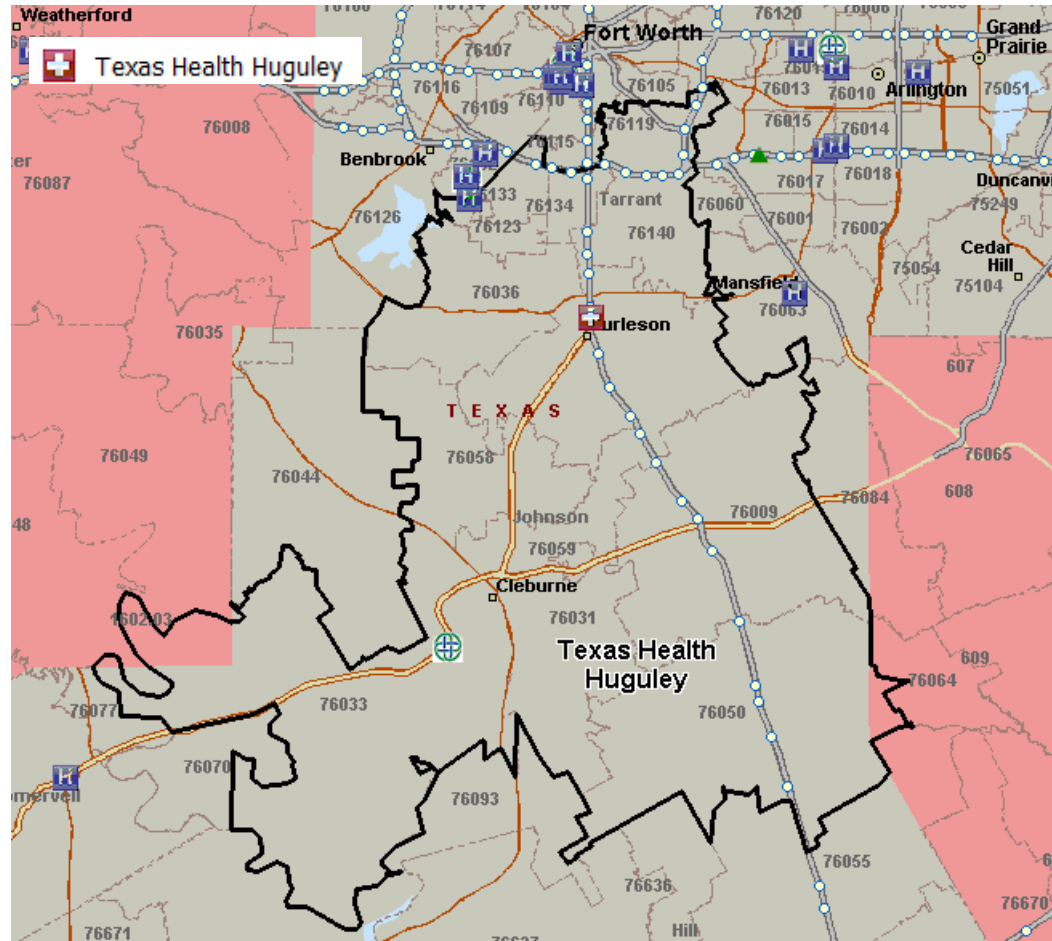

Health Professional Shortage Areas

Mental health

- ▶ Health Professional Shortage Areas (HPSAs) are designated by the U.S. Department of Health and Human Services as having shortages of mental health providers and may be geographic (a county or service area), demographic (low income population) or institutional (federally qualified health center or other public facility).
- ▶ Shortages are defined by population-to-physician ratios, or by other indicators including - but not limited to - poverty rate, infant mortality rate, and physical distance from care.
- ▶ Geographic or demographic shortage areas are shown on map in red. Reported institutional HPSAs are listed.

HPSA Name	HPSA Type	County
North Texas Area Community Health Center, Inc.	Comprehensive Health Center	Tarrant
Federal Medical Center - Carswell	Correctional Facility	Tarrant
Federal Correctional Institution - Fort Worth	Correctional Facility	Tarrant

Providers Supply

Facilities dedicated to serving the population in need

- ▶ Thirteen (13) facilities throughout the community serve the population in need:
 - 8 charitable community clinics
 - 1 federally qualified health center
 - 2 general hospitals (community hospitals with emergency departments)
 - 2 county health immunization clinics

PROVIDER TYPE	FACILITY NAME	STREET ADDRESS	CITY	STATE	ZIP

Note: Texas Health Huguley formerly Huguley Memorial Medical Center

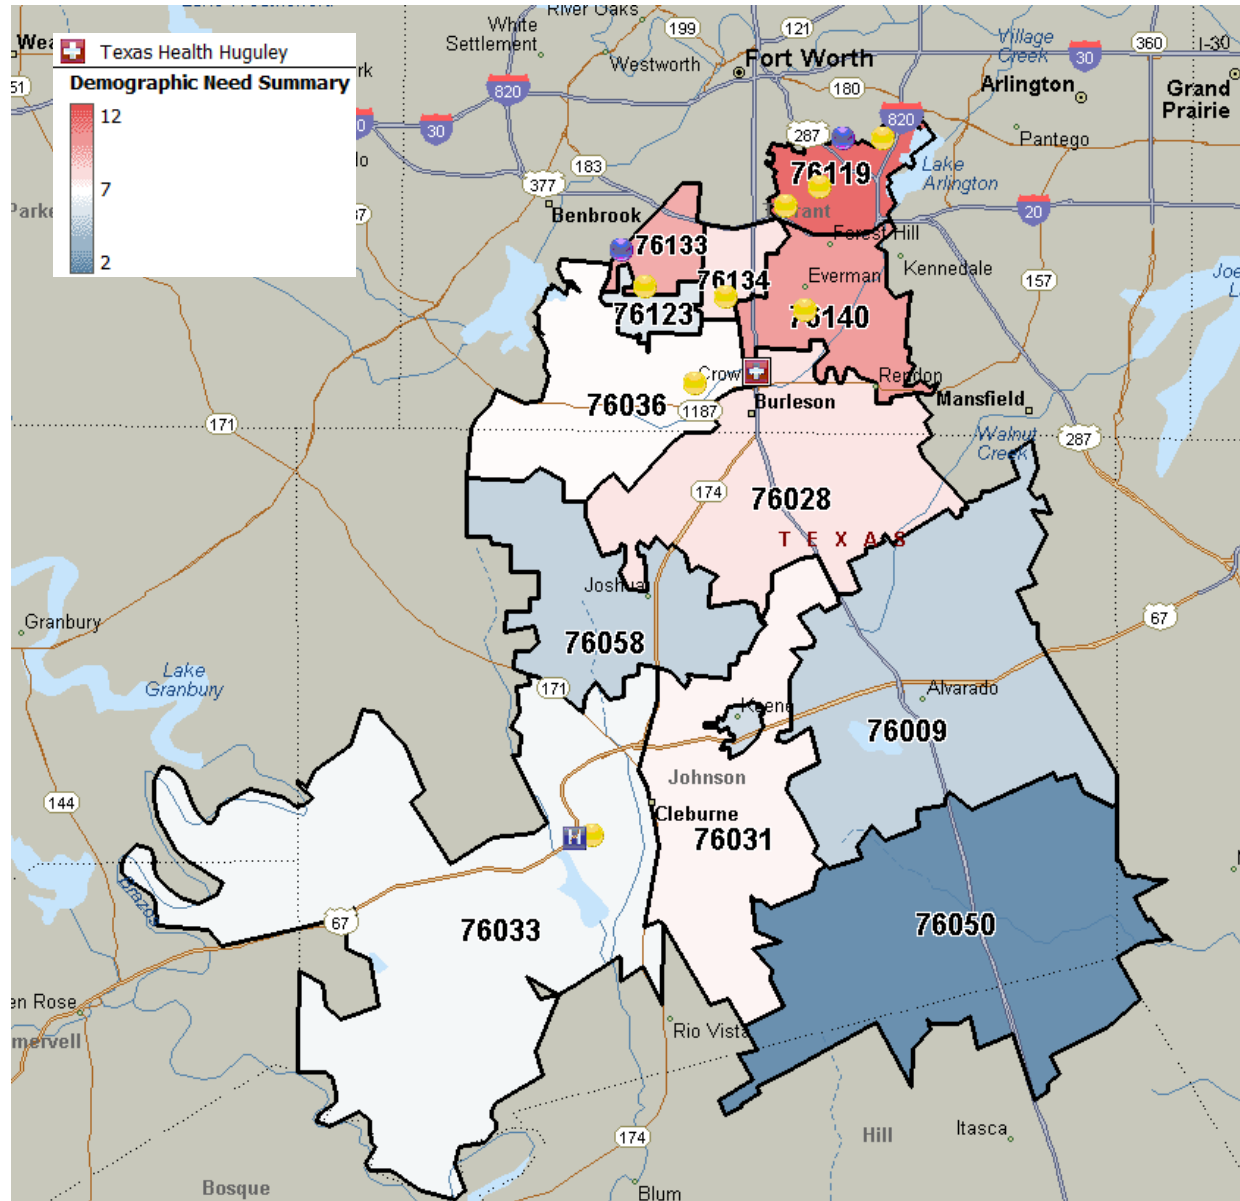

Facilities Dedicated to Serving the Population in Need

- ▶ Many of the facilities concentrated in the northern part of the community, but are in areas identified to be of the most need (shown in red).

PROVIDER TYPE

- COMMUNITY CLINIC, 8
- FEDERALLY QUALIFIED HEALTH CENTER, 1
- H HOSPITAL, 2
- IMMUNIZATIONS, 2

Data Sources: National Association of Free and Charitable Clinics. Texas Department of State Health Services, Health Facility Program. Texas Department of State Health Services, Texas Primary Care Office. Zip code population estimates and projections were retrieved by Texas Health Resources Strategy and Business Planning Department from Truven.

Texas Health Huguley Community Support

- ▶ Texas Health Huguley provides a wide range of community outreach and support programs through entity led, partnerships and collaborations to meet the unmet health related needs of the underserved in the community.

Examples of outreach initiatives include:

- Community Health Education
 - » Community CPR training
 - » Family and childbirth education
 - » Nutrition and physical activity
- Community-Based Clinical Services
 - » Immunizations
 - » Mammograms
 - » Mobile health services
 - » Prostate screenings
 - » Screenings
 - » Ultrasounds
- Health Care Support Services
 - » Grief recovery support group
- Social and Environmental Improvement Activities

Selection of community assets for the underserved

Health Care Related:

- ▶ Texas Health Huguley
- ▶ Texas Health Harris Methodist Hospital Cleburne
- ▶ Southeast Community Health Center – Federally Qualified Health Center (FQHC)
- ▶ Johnson County Indigent Health Care*
- ▶ H.O.P.E Medical/Dental Clinic
- ▶ Camp Sweeney, Camp for Diabetic Children

* Chapter 61 of the Texas Health & Safety Code requires county programs to provide basic health care services for county residents who do not qualify for other state or federal health assistance programs. County programs must provide services including: primary care, immunizations, inpatient and outpatient hospital services, lab and x-ray, skilled nursing facilities, and three prescriptions a month. However, durable medical equipment, home health care, counseling, emergency transportation, dental, and vision are all optional services.

Other Community Support:

- ▶ United Way of Johnson County
- ▶ Texas Neighborhood Services offers energy bill/utility assistance
- ▶ CASA of Johnson County
- ▶ Children's Advocacy Center
- ▶ Community Partners of Johnson County
- ▶ Operation Blessing of Johnson County
- ▶ Meals on Wheels of Johnson & Ellis Counties
- ▶ East Cleburne Community Center
- ▶ Homeless Shelters
 - Haven of Rest Ministries Halfway House
 - Johnson County Family Crisis Center
 - Johnson County Christian Lodge
 - City Of Cleburne Housing Department

Secondary Data Assessment:

- **Review of other recent Community Health Needs Assessments**

Summary of Key Issues Identified in Other Recent Area Community Health Needs Assessments

Primary Data Assessment: Summary of Community Input

Community Input Summary

Survey responses – Texas Health Huguley averages

- ▶ Twelve (12) persons from the community completed the survey summarized below, with responses ranging 1-5, where 1 is “strongly disagree” and 5 is “strongly agree”.
- ▶ The top four issues of most concern to survey respondents appear to be:
 - *Adequate health resources for the indigent (low-income persons) in the community*
 - *Adequate health resources for the other vulnerable populations (tied for 2nd)*
 - *Cost of care as a barrier to access (tied for 2nd)*
 - *Previous negative experiences as a barrier to access*

Indicator	Most favorable Score	Texas Health Huguley Average
Community members are informed and educated about health issues.	5	3.0
Community members know where to go for needed health services.	5	2.9
There are adequate health resources for children in the community.	5	2.8
There are adequate health resources for the elderly in the community.	5	3.0
There are adequate health resources for the indigent in the community.	5	2.1
There are adequate health resources for other vulnerable populations.	5	2.2
Supply (number, type of providers) is a barrier to access in this community.	1	3.3
Cost of care is a barrier to access in this community.	1	3.8
Transportation is a barrier to access in this community.	1	3.4
Language and culture are a barrier to access in this community.	1	2.5
Previous negative experiences are a barrier to access in this community.	1	3.7

Community Input Summary

Texas Health Huguley stakeholder/community meeting

ACKNOWLEDGED STRENGTHS

- There is a “home town” spirit in Oldtown
- Area has lower unemployment rates than the state and overall good economic health
- Institutions work well together – partnership with city & school district and also with hospital
- Easy to pull partnerships together to focus on wellness campaign education and activities

GAPS IN SERVICES/CARE

- Access to care, particularly for the uninsured and underinsured population
 - Pediatricians don't accept Medicaid
 - Limited adolescent behavioral health programs, but even adults do not have sufficient resources
 - Large population of older patients (age 60-65) not yet eligible for Medicare
- Prevention & wellness mobile health services bus offers screenings but not reaching those that need it

SUGGESTIONS AND OPPORTUNITIES

- Invest in public education campaigns, but need to understand what are the most effective media outlets
- Relax regulations that prevent communications from being sent home with children at area schools
- Building another clinic and will be creating an office space for a mental health counselor

COMMUNITY CONCERNS

- The number of economic disadvantaged is growing
- Community does not yet have strong awareness of existing resources
- Public transportation is available only in certain areas of the community
- Not enough activities for kids under 13

Community Input Summary

Texas Health Huguley community representatives

- ▶ Paul Wethington, Vice President - National Bank of Texas
- ▶ Ken Shetter, Mayor - City of Burleson
- ▶ Kelly LaMendola - Texas Department of State Health Services
- ▶ Tom Cowan, Chief of Police - Burleson Police Department
- ▶ Rusty Short, Family Nurse Practitioner - Short Family Medical Center
- ▶ Jamie Harraid, Community/Physician Relations - Texas Health Burleson
- ▶ Ken Finch, President/Chief Executive Officer - Texas Health Huguley
- ▶ Tabitha Guess, Community Coordinator - H-E-B
- ▶ Joe Wascomb, Community Outreach - Texas Health Huguley
- ▶ Lisa Schwarz, Chief Executive Officer - Crazy 8 Ministries
- ▶ Kent Tucker, Vice President - Texas Health Huguley
- ▶ Victoria Sykes, Community Development Coordinator - Texas Health Huguley

Notes to the Study:

- **How the assessment was conducted including data sources**
- **Process for consulting with people representing the community's interest**
- **Process for identifying and prioritizing health needs and services**
- **Gaps that limited ability to assess the community's health needs**

How the Assessment was Conducted

- ▶ Texas Health Resources' Community Health Needs Assessment was a six-month collaborative process, led by Texas Health's Community Health Improvement Department and entity community advocates with significant input from Texas Health's Community Health Advisory Council. Vast amounts of quantitative and qualitative data were collected, refined and analyzed. Approximately 200 community members provided invaluable information, data, and feedback.

- ▶ Texas Health utilized the following approach to complete a community health needs assessment:
 - Create the Vision for the Community Health Needs Assessment
 - Define the Scope, Including the Zip-Code Level Service Area
 - Identify Key Demographics of Service Area
 - Identify Services Provided by Area Health Resources (Supply)
 - Identify Key Health Needs by Service Area (Demand)
 - Identify Gaps in Services Provided
 - Develop Community Needs Model, Including Criteria for Prioritizing Needs
 - Prioritize Community Needs, Based on Data and Model Criteria
 - Develop Strategies to Address Needs
 - Outline Actionable Objectives, Timelines and Implementation Process

- ▶ Secondary data used throughout this analysis was obtained from more than 30 sources, and is outlined in detail on the following slides.

Process for Consulting with People Representing the Community's Interest

- ▶ During December 2012 and January 2013, interviews were conducted with approximately 200 persons representing the community's interests.

- ▶ Information and data were gathered using two different methods:
 - Open-ended discussions, led by Premier, Inc., aimed at soliciting input from the interview participants as to community health resources, as well as the health needs of the community.
 - Likert surveys, containing 11 statements regarding community health for which participants ranked their agreement or disagreement.

Process for Identifying and Prioritizing Health Needs

- ▶ Drawing from the data elements analyzed and presented in each entity community health needs assessment, Texas Health Resources has developed a model to identify and prioritize health needs.
- ▶ At its most basic level, the model outlines all identified health issues in rows, and marks in columns each entity impacted by that specific issue. The specific issues were also grouped into health categories adapted from the Healthy People 2020 categories.
- ▶ Any issue not meeting threshold levels (e.g., a minimum number of indicators showing a problem and/or a minimum number entities having raised that issue) were removed from subsequent analysis.
- ▶ Remaining issues were assessed using criteria designed to rank, or prioritize the issues.
- ▶ Texas Health used the resulting rankings to select which health needs will be addressed over the next three years. Once selected, the organization developed strategies and initiatives aimed at impacting those gaps.

Gaps that Limited the Ability to Assess Needs

- ▶ The vast majority of secondary data required to assess community need was available for Texas Health Resources' analysis.
- ▶ In certain instances, however, data was not available at Texas Health's preferred level of detail. Specific examples of this include:
 - **Zip Code Level Data** – Some health indicators and behavioral factors are published at the county level, not the zip code level, which prohibited Texas Health from analyzing these data for an entity's defined service area. Examples include sexually transmitted disease rates, obesity rates, literacy rates, and many others. These data elements have been included in the community health needs assessment data as reference points but county-level indicators were not used in the prioritization of health needs.
 - **Data for Uninsured and Underinsured** – A significant finding of this study is that access to health services is limited for the uninsured and underinsured. This issue was mentioned numerous times by a wide range of participants. However, quantifying this issue is difficult, if not impossible. There is no publicly available source of data to identify providers who accept uninsured patients or providers who accept patients with Medicare or Medicaid. Estimates have been included in the physician supply and demand section of this study, but these are estimates only and do not provide the ideal level of specificity.
 - **Lack of Efficacy** – Texas Health prefers to utilize evidence based programs to improve the health of the community it serves. However, there are few existing studies that measure, evaluate and/or report the effectiveness of preventative wellness programs and initiatives. Texas Health will proceed with information currently available and supplement with internal expertise as needed.
- ▶ Note: Texas Health does not believe the limitations outlined above impacted Texas Health's ability to reach reasonable conclusions regarding the health needs of the community.

Appendix

Demographics Needs Summary

Population of focus – Grading System

- ▶ Demographic information was collected from Truven Health Analytics for the four below data elements listed below:
 - 2012 total population
 - 5 year population growth 2012-2017
 - Median household income
 - Age 18+ percent uninsured
- ▶ Each of the four elements were ordered either ascending or descending depending upon whether a higher need was suggested:
 - There is more need in densely populated areas
 - There is more need in areas of high population growth
 - There is more need in areas of low income
 - There is more need in areas with high percentages of uninsured
- ▶ These rankings are summed in total and then averaged to obtain a “score” which is itself then ranked.
- ▶ Considering these four key factors, the associated maps show the areas of highest need in darker red to areas of minimal need in dark blue.

Data Sources: Population estimates and projections, income and uninsured, Texas Health Care Information Council inpatient payer mix, were retrieved by Texas Health Resources Strategy and Business Planning Department from Truven.
Higher ranking = higher need based upon the indicator

Health Professional Shortage Areas

Dental care

- ▶ Health Professional Shortage Areas (HPSAs) are designated by the U.S. Department of Health and Human Services as having shortages of dental providers and may be geographic (a county or service area), demographic (low income population) or institutional (federally qualified health center or other public facility).
- ▶ Shortages are defined by population-to-physician ratios, or by other indicators including - but not limited to - poverty rate, infant mortality rate, and physical distance from care.
- ▶ Geographic or demographic shortage areas are shown on map in red. Reported institutional HPSAs are listed.

HPSA Name	HPSA Type	County
North Texas Area Community Health Center, Inc.	Comprehensive Health Center	Tarrant
Federal Medical Center - Carswell	Correctional Facility	Tarrant
Federal Correctional Institution - Fort Worth	Correctional Facility	Tarrant

Texas Health Huguley Hospital Fort Worth South Community health council membership
